

IT Professionalism and Skills Management

Title:	IT Professionalism and Skills Management
Location:	Edinburgh
Date:	16/09/2009
Duration:	One day
Start Time:	0945 with refreshments available from 0915
End Time:	1645

This is a practical course, aimed at those who will be involved in detailed implementation of effective skills management as part of the Government IT profession.

The development of IT professionalism across every part of government is one of the three main themes of the Transformational Government strategy. The work programme addressing this theme covers all parts of government and every person involved in delivering successful IT services in government. This course looks at the use of the Skills Framework for the Information Age SFIA in delivering excellence through the pursuit of IT professionalism.

SFIA underpins the Government IT profession programme, and can help you and your colleagues in the drive for excellence in public sector IT. It provides the basis for definition of a clear career development path for people in IT; highlights skills gaps; and offers an objective performance management structure.
